ABSTRACT

This statistical report presents data in the form of tables, graphs, and text on special education in Nebraska for the year 1994-95 and general trend data going back to 1985. State summary data are provided by child's age, primary disability, and county of residence for the following: Nebraska special education Child Count; ward status; program provider; instructional setting; percent of time spent in special education; and services received. Other data included are: Child Count by county; Child Count by school district; state summary data for children, birth to age 5, by disability, age, and school district; and state summary data for transition of students ages 16 to 21, by disability, age, and school district. Historical data include Nebraska Child Count data by age and disability from 1991 through 1994, Nebraska special education enrollment figures from 1985 through 1994, and United States total enrollment data from 1976 through 1993. Finally, special education program exit reasons by the child's primary disability and age are summarized. Data collection forms are appended. (DB)

The Nebraska Special Education Child Count is conducted each year as of the first day of December. The December 1, 1994, Special Education Child Count Total is 38,763. Enrollment figures for all students are collected by State Statute as of the last Friday of September each year. The September, 1994, enrollment total is 327,688*. Enrollment totals are collected from Public School Districts, Nonpublic Schools, Educational Service Unit Schools and State Operated Schools. Special Education Child Counts are collected from Public School Districts, State Operated Schools and Private Service Providers (such as hospitals and residential treatment centers). While it is recognized that there will be differences in comparing counts taken on different days and from slightly differing reporting entities, these figures represent the available data for the two populations and users of the data are advised of such differences.

Each child who is reported to SESIS has a verified disability according to Nebraska Department of Education Rule 51, is receiving services according to an IEP/IFSP and is counted once in the category corresponding to the child's primary disability. If a child has more than one verified disability, the primary disability is designated by the school district. For example, if a child has a Mental Handicap:Severe/Profound and Orthopedic Impairments, the child's primary disability could be shown as Multiple Impairments and the child would be included in the Multiple Impairments total but not in the count of Mental Handicap:Severe/Profound or Orthopedic Impairments.

Nonpublic School Status

Out of the 327,688 children enrolled for the 1994-95 school year, approximately 12% (40,588) were enrolled in non-public schools. This represents a 5.2% increase from the previous year. Of these 40,588 children enrolled in non-public school, 1,295 children were verified with a disability and receiving public, special education services, a 7.5% increase over the 1993-94 school year. This population is 3.2% of the total non-public enrollment for the year.

The table below summarizes the non-public population receiving special education services by the child's age and primary disability. Non-public school children with disabilities represent 3.3% of the 38,763 children with verified disabilities in 1994. The next page shows the same non-public population by the child's county of residence. The non-public school attended is not necessarily within the child's county of residence.

Ward Status

Of the 38,763 children with verified disabilities in the 1994-95 school year, slightly more than 2% are wards of the state or the court. These children are reported by the school district of financial responsibility or the agency providing the service if a school district cannot be determined.

As represented in the chart below, the disability categories of behavioral disorders and specific learning disabilities together comprise 53% of the ward population. Although there are wards across all age groups, the number of wards is the most prominent between the ages of eight and seventeen. The tables on the next two pages outline ward status by the child's county of residence and primary disability.

Program Provider

A child's program provider is reported as either the child's resident school district, another school district, or an agency/service unit. On December 1, 1994, 86% of the children with disabilities were reported as receiving services from their resident school district. Fifty-five percent of the children age 21 were reported as receiving their special education services outside their resident school district. Similarly, 33% of children with deaf-blindness and 31% of children with both mental handicap:severe/profound and multiple handicaps received services outside their resident school district. The tables on this page show the program provider by the child's primary disability and age.

Instructional Setting

In Nebraska information is collected on ten different settings where children with disabilities receive services. The most frequently reported setting is the public school. In 1994 this service setting was reported for 91.8% of the children with verified disabilities which is .4% less than last year. The other nine settings are listed below with the percentage of their occurrence. The following pages outline the service settings according to the child's primary disability and age.

Percent of Time Spent in Special Education

For all school age children (excluding children below age five) the district is asked to report the percentage of the school year that each child receives special education services outside the regular education classroom. This percentage includes direct special education instruction and services delivered when the chid is removed from their regular education classroom but would not include services such as those of an interpreter utilized in the regular education classroom. Transportation time is also excluded from this percentage.

The three reports which follow show the percentage of time children are spending in special education according to primary disability, child's age and instructional settings.

The information included above will be used to report legally blind children to the American Printing House for the Blind (APH) for the federal quota program enacted in 1879 by the Federal Act to Promote the Education of the Blind. This federal quota program allocates a per capita amount of money designated for purchase of educational materials for eligible, registered children.

In order to be eligible for registration, each child must meet the requirements below. Each child must:

1. meet the APH definition of blindness — central visual acuity of 20/200 or less in the better eye with correcting glasses or a peripheral field so contracted that the widest diameter of such field subtends an angular distance no greater than 20 degrees.

2. be enrolled on the first Monday in January in a formally organized public or private, nonprofit educational program of less than college level, and;

3. have on file with the child's school district a written Individual Education Program (IEP) and a current (completed within the last three years) eye specialist's (opthalmologist or optometrist) report.
